

Jointly organised by the Hong Kong Productivity Council and leading information security organisations in Hong Kong, **Information Security Summit (IS Summit)** will return physically at Hong Kong Convention & Exhibition Centre on **9-10 March 2022**. **IS Summit** aims to provide participants with the latest information security trends and developments.

This year, themed “**Security Transformation for the Next Normal – Evolution of Risk Management and Data Protection in a Post Pandemic World**”, **IS Summit** will focus on how the enterprises can transform their security successfully under the cyber security challenges and the escalating cyber threats for the next normal. The topic will cover emerging cyber attacks and technologies, new security defence framework and risk management methodologies, etc. More details & Free Registration on www.issummit.org.
