

2026 KOREA BUSINESS EXPO **GANGSEO**

Buyer's **Directory Book** of Exhibitors

2026. 3. 31. ^{Tues} - 4. 1. ^{Wed}

Venue | **COEX magok**
(Seoul, Republic of Korea)

History of INTRODUCTION World-OKTA

In April 1981, 101 overseas Korean traders from 16 countries gathered at the Seoul International Trade Fair, where they formed the Overseas Korean Traders Associations to contribute to the economic development of Korea by investing in their home country, fostering compatriot traders, and promoting import and export trade with Korea and agreed to hold a general meeting back in their motherland every year. This marked the beginning of World-OKTA

Since then, World-OKTA, celebrating its 45th anniversary this year, has grown to become the largest overseas Korean economic organization with 154 chapters in 75 countries, and it is still upholding the founding philosophy to “contribute to the economic development of Korea by promoting export.”

World-OKTA will continue its efforts to take giant strides and lead the global Korean economic community.

World-OKTA, the proud overseas Korean economic organization representing 7.5 million overseas Koreans, will stand by the Korean SMEs and youth on their journey toward the global market.

World-Okta

GREETINGS

Dear World-OKTA Members and Distinguished Partners,

It is our great pleasure to welcome you to the official website of the **The 27th World-OKTA Leaders Convention and the 2026 KOREA BUSINESS EXPO GANGSEO**, hosted by the WORLD FEDERATION OF OVERSEAS KOREAN ECONOMIC AND TRADE ASSOCIATIONS (World-OKTA).

Marking its 27th edition, this year's convention will be held for four days from March 30 to April 2, 2026, in Gangseo-gu, Seoul, a key gateway to Korea's capital where advanced industries and vibrant culture coexist.

For the past 45 years, World-OKTA has brought together overseas Korean business leaders, domestic companies, and related organizations from around the world through the World-OKTA Leaders Convention. These gatherings have served as a vital platform for building global networks and fostering economic exchange based on shared growth and cooperation.

The 27th World-OKTA Leaders Convention, held in conjunction with the 2026 KOREA BUSINESS EXPO GANGSEO, aims to support the export expansion and global market entry of Korean small and medium-sized enterprises, while creating tangible outcomes for the global Korean economic community.

This event will feature an exhibition and business consultation program with the participation of approximately 300 Korean companies, alongside World-OKTA members from 154 chapters across 75 countries, overseas buyers, and representatives from related institutions. In total, more than 5,000 business leaders from Korea and abroad are expected to attend, making this convention a powerful platform for expanding Korea's economic reach worldwide.

In particular, through strategic cooperation with Gangseo-gu District and the Seoul Business Agency, we seek to establish a model of mutual growth with local governments by promoting regional economic revitalization, youth employment linkages, and tourism resource promotion. At the core of this initiative is the value of "Connecting Regions with the World."

In addition, participants will have the opportunity to experience a variety of cultural programs, including performances and art fairs, in Seoul—a city where tradition and modernity exist in harmony.

We sincerely ask for your active participation and continued support, and we look forward to welcoming you to a meaningful gathering in Gangseo.

Thank you.

parkjongbum

23rd President of World-OKTA

Company intro

AreumDawoon Cosmetics Co., Ltd. is a professional cosmetics manufacturer established in 1999. We specialize in ODM/OEM production of hair care and skincare products. With CGMP-certified facilities and strong R&D capabilities, we supply products to global markets.

Product Name

After14 HYCORE Aqua Vibe Toner, Ampoule, Cream, Foam Cleanser, Pads, Sun serum

Product Details

After 14 — Closer to perfection in 14 days.

We research the effective adhesion of active ingredients to the skin. By carefully selecting high-performance ingredients, we develop products that help them remain longer within the skin for sustained results.

All After14 products are clinically tested on human subjects and proven effective.

Our moisturizing and skin-texture care line, AQUA WAVE, includes toner, ampoule, cream, foam cleanser, pad, and sun serum.

Powered by our proprietary ingredients CONNECT BOND® and HYCORE™, our formula effectively binds and stabilizes key active ingredients within the skin, delivering long-lasting performance and an innovative skin improvement solution.

Company Requirements

After14 is seeking strategic partners for exclusive distribution across the United States, Europe, and Southeast Asia.

We are also open to collaborating with global partners interested in ODM development, leveraging our technology and manufacturing expertise.

Company intro

The Iconic Companion for Your Journey

As the world's exclusive manufacturer and distributor of KODAK luggage, we bring a legendary heritage to the modern traveler. Currently expanding our global footprint with exports to Australia and Indonesia, we offer everything from compact carry-ons to checked luggage and essential travel accessories.

Our philosophy is simple: to be the most stylish companion on your journey. By blending creative design with uncompromising convenience, we transform every trip into a vibrant experience.

Building on our successful foundation in the Korean market, Kodak Carrier continues to innovate, crafting products that stay true to Kodak's unique brand identity. With our signature iconic colors and bold designs, we invite you to start a new chapter of travel. Kodak Carrier—your perfect partner for every moment.

Product Name

KODAK Carrier COLORPOP

Product Details

The 'K' alphabet engraved on the sleek, simple body serves as a signature design point that captures Kodak's iconic heritage. Our curated color palette creates a bright, vivid travel atmosphere, further accentuating the positive and energetic brand mood that defines Kodak.

Moving beyond the traditional limits of black and silver luggage, we have developed a color lineup rooted in Kodak's heritage and iconic colors. The result is a collection filled with bright, optimistic vibes. These emotional color accents provide a refreshing presence, making you stand out beautifully in any travel destination.

Company intro

Reimagining the Global Shaving Experience Founded in 2018 as a pioneering razor subscription service, Lazy Society has evolved into a global shaving specialist brand dedicated to innovating the men's morning routine. Powered by our proprietary 'Transparent Cica Shaving Gel,' we provide definitive solutions for chronic shaving-related skin issues, such as razor burn and irritation. Our commitment to functional excellence has secured a dominant market position in South Korea, with a presence in over 640 Olive Young stores and military PX outlets. We are now scaling our proven success globally. Following a strong performance on Amazon Japan, we are aggressively expanding our footprint across Europe, the UK, and Southeast Asia. By focusing on the 'Essence of Shaving' and eliminating the unnecessary, Lazy Society is redefining the category. We are committed to becoming the global authority in shaving, transforming a daily chore into a seamless, high-performance care experience.

Product Name

Lazy Society Cica Shaving Gel

Product Details

This product is optimized to soothe the skin that has been irritated by shaving, by removing hazardous and harmful ingredients such as isobutane, and butane like conventional shaving products, and filling it with calming ingredients. Unlike foam that only produces bubbles, it is applied without any gaps and adheres firmly to the beard and skin. It protects the skin thoroughly and supplies moisture to make the beard moist and soft. With just a slight push, you can shave much more cleanly. Shaving Gel 2.3 has undergone a total of four upgrades, including Shaving Gel 1.0, 1.5, 2.0, and 2.3. This is our unique operating method, which enables us to further enhance the product to make it even more complete, reflecting continuous customer feedback. We operate a test team with our existing subscription customers from the product planning stage, and conduct sampling tests with customers, which is qualitatively different from the one-way planning and sales of conventional companies. Unlike traditional companies, we plan to further enhance our current customer communication methods, so that we can become a new consumer goods company for the new generation.

Company intro

Lillycover Co., Ltd. is a leading beauty-tech company recognized by global corporations for its unique skincare services and optimized personalized cosmetics for individual skin. Emphasizing the importance of skin health, Lillycover was established to provide customized cosmetic solutions tailored to individual needs, enhancing consumer confidence and skin wellness. Our mission is to offer precise diagnosis and personalized care that address the issues caused by mass-produced products, enabling consumers to gain a deep understanding of their skin and purchase a one of a kind product suited perfectly to them. By integrating ICT and BT, we deliver genuine personalized cosmetics through customization that reflects personal preferences. With continuous technological advancement and enhanced data analytics, we are pioneering revolutionary changes in the beauty industry—from skin diagnosis and product formulation to manufacturing and sales. Our compact formulation solutions, use of high-performance ingredients specialized for skin concerns, and 1:1 personalized online care services demonstrate the potential for complete skincare management.

Product Name

Customized Skincare Solution

Product Details

The personalized cosmetics flexible production system Enima is integrated with the skin diagnosis device Muilli and the skin analysis software Skindia. Upon order, the system uses robotics to dispense precise quantities under sterilized, temperature- and humidity-controlled conditions, producing on-demand customized cosmetics in an average of 3 minutes and 50 seconds. It can formulate approximately 25,000 different recipes per product and allows for freely customizable bespoke formulations tailored to individual preferences.

Company intro

Herbloom is a vegan skincare brand born from a genuine concern for skin health beyond external beauty. Based on safe, plant-derived ingredients, Herbloom focuses on developing skincare products that are both effective and gentle on the skin. Our flagship products are the Kombucha skincare line—toner, serum, and cream—formulated with Herbloom’s patented Kombucha Extract Water. Leveraging the benefits of fermented ingredients, the line supports skin condition improvement and barrier care. In addition, Herbloom’s two sunscreen products, developed using eco-friendly packaging materials, have gained strong attention for combining sustainability with performance. Currently, Herbloom is available through major Korean retail channels, including Olive Young, Hyundai Department Store, and Lotte & Shilla Duty Free, and is actively expanding globally with exports to over 30 countries.

Product Name

Kombucha Plant Biome Toner

Product Details

“Mildly Acidic Balancing Toner

A mildly acidic toner that helps restore the skin’s pH and oil-moisture balance immediately after cleansing.

- Formulated with patented kombucha extract
- Dermatologically tested for low irritation
- 99.99% naturally derived ingredients

Available Channels: Olive Young, BeClean, Musinsa, Naver, Coupang, Amazon, Qoo10, etc.

Certifications & Registrations: MoCRA, CPNP, SCPN, BPOM, Japan, Vietnam, etc.

Company Requirements

We are not looking for buyers focused on short-term transactions. Instead, we seek distribution partners who are interested in growing the brand together with us in their local market. Beyond a simple buy-and-sell relationship, we value partners who understand the brand’s vision and values, and who are willing to develop market-specific strategies through close and ongoing collaboration. Herbloom aims to build long-term partnerships based on trust and communication, working together to establish the brand sustainably in the local market and to create a stable and scalable distribution structure.

Company intro

Soonsoojaa, a cosmetics brand company based in Gangnam, Korea, holds exclusive patents for 32 global technologies and formulas, offering healthy cosmetics for a pure and beautiful life. Its products are known for their exceptional quality, including eczema-friendly dermatological cosmetics and innovative items such as the microcurrent mask that utilizes high-tech technology. The 3-second cleansing pads are particularly popular and are the number one best-seller. Soonsoojaa products are available on our Korean online store and on major e-commerce platforms. We also have a presence in offline stores, including Shinsegae Department Store and AK Plaza.

Product Name

Soonsoojaa One-Step Water Cleansing Pad (100pads)

Product Details

“3-Second Cleansing – Just Wipe Without Water and Go to Bed”

1. Purpose

An all-in-one cleansing pad that offers quick and easy cleansing and hydration anytime, anywhere — no water needed.

2. Key Features

- 1) 3-Second Finish: Just wipe — no rinsing required
- 2) 6-in-1 Functionality: Cleansing + Exfoliation + Toning + Moisturizing + Soothing + pH Balance
- 3) Low-Irritation Formula: pH 5.5, 0.00% skin irritation (clinically tested)

3. Selling Points

- 1) A complete cleansing solution without water
- 2) Streamlined skincare routine — replaces multiple steps with one pad
- 3) Safe and gentle for sensitive skin, aligned with the global K-beauty trend

Company intro

We are the market-leading company for Well-Life & Well-Beauty, which develops and sells high-tech materials related to well-being and home appliances as well as the market leader for products such as anti-microbiology and deodorization-related high-tech products, electrolysis technology products, and the latest trend of beauty devices.

Product Name

GALVANIC LED BOOSTER

Product Details

The Galvanic LED Booster is the best-selling product in Ecowell's beauty device lineup and is receiving great response from general cosmetics buyers due to its small size and ease of use. Currently, home beauty devices are mainly multi-function devices with large sizes and various functions, but there are also many needs in the handheld size field, and Ecowell is demonstrating unrivaled technology in this field.

The main function of the product, galvanic current, helps absorb active ingredients in cosmetics, and the micro-vibration, red LED, and IR functions that work simultaneously help absorb cosmetics, and promote blood circulation and skin regeneration through skin massage stimulation.

The product was recently delivered in large quantities to LG Household & Health Care, and samples are also being supplied to COSTCO Korea, one of the largest store chains globally. We are responding to customer requests by changing the product body color and printing the logo, making it easy to manufacture as OEM.

Company Requirements

I'd like to meet buyers from the Middle East, Europe, and South America (cosmetics, beauty equipment, distributors, and other importers).

Company intro

COTTERANG INC established in 2006 and a young bio venture company that researches, develops, manufactures, and sells skin functional cosmetics based on fermentation science, the best technology in mankind. Currently, it is a functional cosmetics brand company that sells its own brand product called Wish Formula Brand to more than 1,000 famous dermatology hospitals and major online malls in Korea. It exports to the Middle East (Saudi Arabia, UAE, etc.), Europe (approximately 7 countries), Russia, Japan and Southeast Asia. It has registered 5 patents and about 20 trademarks and designs as intellectual property rights, and its main products are a high-functional skin care series, a peeling pad series using patented pads, an ampoule pad series, and about 60 functional cosmetics for whitening, wrinkles, and antioxidants. Ten of its main products have obtained European EU CPNP certification. It is currently constantly communicating with consumers to develop innovative products.

Product Name

Wish Formula Oh My Body Bar

Product Details

This is a new concept body-only home beauty product developed to remove dead skin cells, waste, fine dust, and odors without irritation and at the same time moisturize and smooth the skin, giving the effect of receiving professional skin care, by applying patented tools and programs (No. 10-2024-0115625, 10-2024-0115628, 30-1311074,PCT/KR2025/009900) and AHA, Centella Asiatica, Vitamin E, Beta-glucan, Natural Fermented extracts, Moisturizing ingredients, etc. After wetting your body with water, put your fingers on the band and gently rub every nook and cranny of your body, then wipe it off with water. It is especially good to use on areas with a lot of sebum and dead skin cells, such as knees, elbows, feet, and heels. After use, rinse thoroughly with water, hang it on a holder, etc., and reuse it whenever necessary.

Company Requirements

Individuals or companies interested in innovative functional cosmetics, regardless of whether they are online or offline, and who wish to become distributors

Company intro

CraveCorp is a premier K-Beauty brand development and distribution firm based in the heart of Seoul. We focus on delivering high-performance, cost-effective solutions through our flagship brands, MiniGlam and Punchlab. MiniGlam, a winner of the 2025 Seoul Award, specializes in high-concentration ampoules and makeup-prep solutions. Punchlab is a globally trending brand supplying innovative stick-type masks to E-mart, Korea's leading retailer. By sourcing directly from the manufacturer, we offer the most competitive pricing and stable supply. We invite global retailers to experience a transparent and efficient K-Beauty partnership with CraveCorp.

Product Name

MiniGlam Exobio-some Shot Ampoule 7-Piece Lineup

Product Details

Daily skin changes? Answer with today's customized SHOT. MiniGlam encapsulates highly specialized, high-performance ingredients tailored to specific skin concerns within its cutting-edge delivery technology, ***Exobio-some***. This high-concentration ampoule collection delivers active ingredients quickly and precisely deep into the skin, offering efficacy on a whole new level. Choose the 'shot' your skin needs based on its condition that day and complete your own personalized skincare routine.

7 Ampoule Lineup & Key Benefits

1. [Soothe/Repair] Cica Madecassoside Shot
 - Key Ingredients: Cica (Centella Asiatica Extract), Madecassoside
 - Benefits: An emergency soothing shot that quickly calms skin irritated and inflamed by external stressors. Helps reduce redness and restore damaged skin condition.
2. [Hydration/Barrier] Hyaluronic Acid Panthenol Shot
 - Key Ingredients: Complex Hyaluronic Acid, Panthenol (Vitamin B5)
 - Benefits: A powerful moisture barrier shot that densely fills and firmly locks in hydration from within. Solves deep dryness and cultivates dewy, radiant skin all day long.
3. [Brightening/Radiance] Vitamin C Glutathione Shot
 - Key Ingredients: Vitamin C Derivatives, Glutathione
 - Benefits: A translucent radiance shot that brightens dull skin tone to a clear, luminous glow. Delivers dazzling brightening effects while caring for blemishes and infusing skin with vitality.
4. [Pores/Elasticity] PDRN Retinol Shot
 - Key Ingredients: PDRN (Salmon DNA), Retinol
 - Benefits: A total anti-aging shot that tightens enlarged pores and restores elasticity to sagging skin. It aids skin regeneration and cares for fine lines, creating a smooth and firm skin texture.
5. [Texture/Tone Care] Niacinamide Bakuchiol Shot
 - Key Ingredients: Niacinamide, Bakuchiol (plant-based retinol alternative)
 - Benefits: A low-irritation texture-correcting shot that smooths rough skin texture and balances oil and moisture levels. A daily care product that helps reduce blemish marks and maintain a clear skin tone.
6. [Nutrition/Radiance] Ceramide Rice Shot
 - Key Ingredients: Ceramide NP, Rice Bran Extract
 - Benefits: A high-nutrient radiance shot that deeply nourishes and hydrates dry, rough skin. Strengthens weakened barriers to build healthy, radiant skin's inherent resilience.
7. [Lifting/Vitality] Peptide Caffeine Shot
 - Key Ingredients: Peptide Complex, Caffeine
 - Benefits: A firming lifting shot that energizes and lifts tired, sagging skin. Helps reduce puffiness and cultivates vibrant, youthful-looking skin.

Company intro

FEELCOS Co., Ltd. is a fragrance and beauty company operating two proprietary brands, neusn and AURAFUM, distributed across both online and offline retail channels.

neusn is a certified vegan skincare brand in Korea and Japan, formulated with 200,000 ppm hyaluronic acid to provide deep hydration and enhanced skin barrier support, specializing in high-performance moisture care solutions.

AURAFUM is a Korean niche fragrance brand that leverages an AI-driven personalization system to precisely identify individual scent preferences. Through 40 curated fragrances and 40 layering options, AURAFUM empowers customers to discover and craft a signature scent uniquely tailored to their identity, redefining personalization in K-perfume.

Product Name

PeachMicrobiome 78 PDRN Toner

Product Details

- Balances Skin Microbiome & Soothes Sensitivity
- Deep, Long-Lasting Hydration
- Lightweight Milky Absorption

Strengthen your skin's health from the very first step. This toner combines peach-derived Microbiome complex and PDRN to support a balanced skin ecosystem while calming and soothing sensitive or easily irritated skin.

It deeply hydrates and maintains moisture throughout the day, leaving skin soft and supple without any sticky residue. The lightweight, milky texture absorbs quickly, creating a smooth, comfortable base that boosts the effectiveness of your entire skincare routine.

Company Requirements

Buyers interested in Korean beauty products and beauty-related products.

Company intro

Labl Corporation is a comprehensive business partner that connects the full brand lifecycle—from planning and product/content production to online/offline distribution and performance marketing. By combining market data with hands-on expertise, we deliver practical, executable strategies and support sustainable growth for clients in Korea and beyond through strong partner collaboration. We build long-term trust through transparent communication and responsible operations.

Product Name

Arctic Ritual Professional Kit

Product Details

This is a comprehensive professional care kit designed to replenish everything from the skin's foundational immunity to energy, hydration, and nutrition. Going beyond simple nourishment, it employs a Dual-Action Synergy mechanism

Core Mechanism: It revitalizes skin elasticity compromised by aging, stress, and external aggressors through a 'Lifting Injection' effect, aiding in immediate firmness recovery.

Key Ingredients: Contains Polylactic Acid (PLLA) to support skin structure, Lactobacillus for a healthy skin microbiome, Bakuchiol (a plant-based retinol alternative), and NMN to activate cellular energy.

Benefits: The step-by-step application of the concentrated 'Neige perlée Ampoule', booster, and cream restores three-dimensional volume deep within the skin and builds a robust immune barrier.

Company Requirements

Our primary goal is to establish local offline distribution by country for the premium beauty brand we currently distribute, with online distribution as a secondary objective. Accordingly, we are seeking partnerships with distributors capable of offline retail distribution or local direct sellers (resellers/sellers) in each market.

Product Name

arlt Paper Cleaner Compact

Product Details

[Small & Lightweight Fabric Cleaner] Compact

The arlt Paper Cleaner is the most eco-friendly tape cleaner, crafted entirely from paper. It is the result of a collaboration between Yuhan-Kimberly, Korea's leading household goods company renowned for its premium tape technology, and REVATION, bringing together innovative paper-mold technology and refined design expertise.

Free from plastic and made solely of paper, it is reimagined as a high-end lifestyle object. Safe for both skin and fabrics, it delivers a smooth, clean, and effortless experience—whether in everyday life or special moments.

After use, it can be disposed of through proper paper recycling, returning naturally to the environment and completing the final step of a truly sustainable cycle.

Company intro

Founded in May 2005, My Home Shopping is a company that manufactures and exports kitchen containers, etc. to Taiwan, Thailand, Malaysia, etc. In order to meet the needs of our customers, we are developing a variety of idea products such as ceramic coatings, stone coatings, and pocherin enamelled coatings for kitchen containers. We continue to do business with Asian countries and plan to expand our business to Europe and the Middle East. Based on extensive knowledge and experience in the field of business, we are striving to become a leader in the global B2B business that provides excellent products and services at a reasonable price. With the aim above, we have been actively participating in overseas exhibitions and fairs since 2010, and we plan to continue to participate in various overseas and domestic fairs to fully understand the needs of our customers. It won the 2013 Seoul Fair Excellent Design Product Award from the Seoul Business Agency, applied for an exporter of origin (kitchen container) for each item to actively utilize the FTA, and was designated as the 3rd Export Promising Small and Medium Business Administration in 2011, 2017, and 2022. We will continue to do our best in quality and service.

Product Name

Vissart Woove IH Pan & Vissart Speed Multi-pan

Product Details

*Product Features

1. Safe & Eco-Friendly Ceramic Non-Stick Coating
 - Proprietary ceramic coating
 - PFOA-FREE and safe for everyday use
 - SGS-certified for safety and quality assurance
2. Premium Aluminum Die-Casting Full Mold Construction
 - Made from high-quality Korean cast aluminum
 - Lighter and more durable than cast iron
 - Excellent heat conduction for even cooking
3. Triple-Layer Ceramic Coating

- Superior non-stick performance
- Highly scratch-resistant and long-lasting
- Easy to clean and maintain
- 4. High Heat Efficiency (Over 90%)
- Advanced induction disc technology
- Minimizes heat loss and ensures fast, even heating
- Protects induction cooktop surfaces
- 5. Compatible with All Heat Sources
- Suitable for gas, induction, hot plate, halogen, and highlight cooktops
- 6. Elegant Premium Wooden Handle
 - Natural wood grain design
 - Comfortable and secure grip
 - Built-in hanging loop for convenient storage
- 7. Double Pouring Rim Design
 - Prevents dripping for cleaner, more convenient cooking and serving
- 8. All-in-One Multi-Purpose Design
 - Functions as both a pot and a frying pan
 - Ideal for soups, stir-frying, grilling, and everyday cooking

*Available Sizes

- Multi Pan: 16 cm / 20 cm / 22 cm / 24 cm
- Frying Pan: 20F / 24F / 26F / 28F

Company intro

We are presenting a tiny echo and abundance to people's hearts. SPEXTRUM is a group of creators working on realizing creative ideas. SPEXTRUM is composed of a team of designers, artists and engineers with different backgrounds, develops new products through collaboration with various fields. SPEXTRUM has been releasing new products steadily since 2008 which have been sold for many years in places, such as design shops located in Europe, USA and Japan, and famous museums and galleries such as MoMA and PONFID. SPEXTRUM aims to create a product that can inspire people, that is, to find the essence of the story, and to create a reasonable product, rather than pursuing an outward appearance. We look at the various issues facing companies and brands from a new perspective of 'design gaze', find out the hidden essence in it, and solve it with the appropriate answers accordingly. Through this new perspective, SPEXTRUM finds and suggests the essentials for people and society, listening to stories that have not been.

Company intro

Built on the philosophy that “safety and beauty must go hand in hand,” YBB is a global K-Beauty company specializing in the research, development, manufacturing, and distribution of clean beauty products with a strong focus on organic cosmetics. From the very first stage of ingredient selection, YBB prioritizes organic and clean standards, and directly plans and manages the entire process—from formula development and international certification to production control, design, and global distribution. Through this integrated approach, YBB places the highest value on developing authentic organic and clean beauty products that can be safely used by the entire family.

• Brand Portfolio

YBB operates two brands, each built on a clear concept and well-defined target audience.

ORGAMILY

An organic, low-irritation family skincare brand designed for safe and gentle use by all family members.

REASONOR

A clean K-Beauty color cosmetics brand developed with organic ingredients and clean formulations, carefully balancing skin safety with makeup performance. All products are formulated with a focus on organic ingredients, with the fundamental principle of excluding unnecessary and potentially harmful substances.

• Trust Built on International Certifications

YBB goes beyond declarative clean beauty claims and has established a verified organic and clean system through internationally recognized and authoritative certifications.

COSMOS ORGANIC / ICADA Clean Beauty / German Dermatest – Highest Rating for Low Irritation / PETA Cruelty-Free / Vegan

These certifications form the foundation of YBB's quality competitiveness as a trusted organic and clean beauty brand in the global market.

• Global Business Expansion

Based in Korea, YBB continues to expand its global presence through partnerships with buyers and distribution partners across the United States, Japan, Southeast Asia, the Middle East, and Europe.

B2B / B2C dual-channel strategy

Country-specific export regulations and organic/clean certification compliance

Joint planning of local distribution and marketing strategies

Product Name

ORGAMILY BEBEID Moisture Lotion

Product Details

ORGAMILY BEBEID Moisture Lotion – Certification-Focused Product Introduction
ORGAMILY BEBEID Moisture Lotion is an organic, low-irritation, high-moisture lotion developed for safe daily use by the entire family, from delicate baby skin to sensitive adult skin. This product is not built on marketing claims alone. It is formulated and verified based on internationally recognized certification standards, ensuring safety, reliability, and global credibility.

• Trust Built on International Certifications

ORGAMILY BEBEID Moisture Lotion has been developed in compliance with strict global standards and is supported by internationally recognized certifications:

COSMOS ORGANIC Certification

A globally recognized organic cosmetic certification verifying strict organic ingredient standards and controlled manufacturing processes.

ICADA Clean Beauty Certification

A German clean beauty standard that excludes ingredients potentially harmful to human health and the environment.

German Dermatest – “Excellent” Rating

Clinically tested on sensitive skin and awarded the highest grade for skin compatibility, confirming very low irritation potential.

PETA Cruelty-Free Certification

Certified as a product developed without any animal testing.

Vegan Formula

Formulated without animal-derived ingredients, based on plant-derived components (applied on a product basis).

These certifications objectively demonstrate a level of safety, transparency, and trust appropriate for baby and family skincare.

• Formula Designed to Meet Certification Standards

Formulated with a strong focus on organic ingredients
Free from unnecessary or potentially irritating substances

Designed for baby-safe and sensitive-skin daily use
Developed in accordance with global organic and clean beauty standards

Company Requirements

Overseas distributors and professional buyers specializing in family-friendly, low-irritation organic skincare products

Company intro

Modam Global Nature has grown from the development of a natural solid shampoo for hair loss prevention, initially starting with the use of exceptional Artemisia Sieversiana extract known for its anti-inflammatory effects, addressing the major concern of hair loss among modern individuals.

- In 2020, we established a factory in compliance with ISO 22716 standards. All the raw materials we use are of EWG Green grade or higher, ensuring the use of high-quality, edible ingredients.
- The natural solid shampoo for hair loss prevention has become a mega-hit product, achieving 4.5 billion KRW through major home shopping channels in Japan. We continuously strive to meet customer needs by not only offering soap and skin care cosmetics but also introducing a variety of products, including make-up cosmetics, diversifying our lineup.
- We are making efforts to create healthy cosmetics by incorporating love for people and a reverence for nature, using beneficial natural ingredients and our proprietary fermentation and maturation technology.
- Products from Modam Global Nature are produced through a fermentation and maturation process utilizing nanotechnology, removing toxicity from herbal raw materials to distinguish them from traditional herbal products. The particles are broken down to increase the surface area, enhancing product absorption for maximized effectiveness in preventing hair loss.
- We have been awarded the Gold and Bronze prizes at the Korea International Women's Invention Exhibition, and hold patents for solid shampoo bars in both Korea and the United States.
- Through continuous research and development, we were selected as a Next-Generation World-Class Product and Manufacturing Company in 2020, received the Top Export of \$1 million, Commendation from the Minister of Trade, Industry and Energy, Selected as a promising export small and medium enterprise, Commendation from the Minister of SMEs and Startups, Gyeonggi-do export frontier company certification, Obtained venture business certification in 2021, Acquired Inno-Biz certification in 2022, designated as a G-Pass company of the Public Procurement Service, won the Top of \$2 million in exports, and received a Prime Minister's Commendation in 2023 and are constantly striving to produce the best quality and valuable hair-related products.
- Our products, made with verified technology tested for safety and hair loss prevention, are recognized not only domestically but also internationally. We have passed the US FDA heavy metal testing standards and obtained functional cosmetics certification from the Korea Food and Drug Administration, as well as European CPNP cosmetics certification, Vegan certification, UAE ECAS certification and USA MoCRA registration.

Product Name

Natural Fermented & Ripen Scalp Care Shampoo Bar

Product Details

No Artificial additives, hand-made with 100% natural ingredients. The Shampoo Bar contains Artemisia Sieversiana which has anti-inflammatory and antioxidant effects and it could cure a bed sore. There are 20 other herbs that prevent hair loss such as Houttuynia cordata, Greentea, Funnel seed, Mint, Persimmon Leaves, Black Ginseng, Black Garlic, Rosemary and Moringa. Modam's fermentation and aging technology removes harmful substances from natural ingredients and maximizes the absorption of nutrients. When using shampoo bar, scalp inflammation decreases, hair becomes thicker, and with continuous use, hair loss is reduced, and new hair growth can be observed. It is also effective in improving various scalp problems such as dry scalp and itching due to dandruff. It is already verified by prestigious institutions like KTR, KCL and KDRI (Korea Dermatology Research Institute). Kyung Hee Oriental Medicine Hospital's study found that Natural Fermented Ripen Shampoo bar's core ingredients Artemisia Sieversiana has a very high anti-inflammatory rate that can cure bed sores. In Korea, Artemisia Sieversiana is germinated and grown only by MODAM since 2013 and MODAM has a patent for composition. Natural soap's weakness in humidity and less bubble was covered by using Artemisia Sieversiana. Treatise of Artemisia Sieversiana extract's effect on hair loss prevention and cell regeneration was published in 2022 Journal of the Korean Medical Association Vol. 43 NO. 1 (March 2022).

Company intro

STU International Co., Ltd. is a global K-beauty platform company encompassing cosmetics manufacturing, international trade, wholesale and retail distribution, and e-commerce operations. Over 90% of the company's revenue is generated from overseas markets, reflecting its strong export-driven business model and extensive global sales experience across both B2C and B2B channels. In 2024, STU International launched its proprietary brand YOUTH O'CLOCK, which has since expanded into more than 20 countries, achieving rapid global growth. The company operates robust omni-channel distribution capabilities by integrating global e-commerce platforms such as Shopee, Qoo10, and Amazon with offline channels including pop-up stores. In addition, STU International collaborates with KOTRA and other government agencies to provide comprehensive support for Korean small and medium-sized cosmetics brands, covering overseas market entry, export contracts, and global marketing initiatives.

Product Name

YOUTH O'CLOCK Time Concentrate Serum Cleanser (150ml)

Product Details

Time Concentrate Serum Cleanser (150ml)

The next generation Cleanser with serum-like texture, containing actual key ingredients found in serums.

- It is a 3-in-1 skincare product that provides the effects of oil, remover, and gel with just one single wash, without the need for double cleansing.
- You can achieve cleansing, skin texture refinement, exfoliation, and whitening improvement effects all at once.
- It has passed Skin Irritation Test.
- It contains Niacinamide 5%, and PHA 3%.

YOUTH O'CLOCK Brand

- Embrace the moment — where time stands still and your skin finds its most youthful glow! YOUTH O'CLOCK.
- 'Simple is beautiful, Beauty is simple.' - YOUTH O'CLOCK, which was launched in January 2024, currently consists of two products: Time Concentrate Serum Cleanser & Time Rebooting Ampoule Shot. These two products provide the effect of 5-6 steps of skin care in just 2 steps.
- They contain YOUTH 8 COMPLEX(8 peptides, 8 Hyaluronic acids, 8 Vitamins) which is YOUTH O'CLOCK's unique total youthcare ingredients.
- All products have met the Clean at Sephora entry standards and excluded 61 harmful ingredients specified by HwaHae(excluding fragrance)

Company intro

LUK Corp. is a cosmetics manufacturing specialist that provides OEM, ODM, and OBM services to domestic and international clients seeking to build their own beauty brands. The company offers comprehensive, end-to-end support across the entire cosmetics manufacturing process—from product planning and formula development to packaging selection, production, quality control, and export operations.

With extensive experience working across multiple global markets, including Vietnam, the United States, Australia, India, Singapore, and Malaysia, LUK Corp. delivers customized manufacturing solutions and export services tailored to the specific needs of global brands and buyers.

Furthermore, LUK Corp. has developed its own AI-based cosmetics manufacturing platform to address the complexity and inefficiencies inherent in the traditional manufacturing process. This platform digitalizes and automates key stages of production, such as product planning, manufacturing condition comparison, and communication management, enabling clients to build cosmetic brands more easily and efficiently. Through this innovation, LUK Corp. is evolving beyond a traditional manufacturer into a technology-driven, next-generation K-beauty manufacturing platform company.

Product Name

Capsule Tone-Up Cream

Product Details

Capsule Tone-Up Cream instantly brightens and evens out the skin tone with a natural, radiant finish.

Its fine capsule formula melts smoothly into the skin, helping to correct dullness while keeping the skin hydrated and fresh.

Perfect for daily use or as a lightweight makeup base.

<https://www.ereph.com/>

Company intro

EREPH is skincare-focused beauty brand dedicated to awakening the skin's natural strength. Rooted in the philosophy of "uncovering hidden beauty," we focus on essential products that deliver noticeable effects, rather than complex routines.

EREPH aims to provide daily skincare suitable for all skin types and lifestyles, prioritizing uncomplicated formulations and ease of use. We especially focus on developing products that show noticeable skin condition improvements with repeated use.

Key Brand & Product Lineup

1. MIDAMS – Daily Skincare Line

MIDAMS is EREPH's skincare brand featuring a daily care line centered around serums, cream, and sunscreens.

MIDAMS FORMING GLOW VITASOME SERUM
: With a texture that absorbs quickly, it balances moisture and nutrients, making it suitable for daily use.

MIDAMS GLOW VITASOME CREAM

: Focused on skin barrier care, it offers hydration without stickiness, suitable for all seasons.

MIDAMS MOISTURE ESSENCE SUN CREAM
: Combines UV protection with skincare elements, providing a comfortable application without a white cast or heavy feel.

2. EREPH JEJU VOLCANIC BUBBLE PACK - Pore Care

The EREPH JEJU VOLCANIC BUBBLE PACK is our signature product, offering a wash-off type bubble pack that manages pores, dead skin, sebum, and impurities in one go. Jeju volcanic ash absorbs and removes unnecessary impurities with less irritation, while rich bubbles formed upon application refine the skin texture, leaving it clean and smooth.

EREPH seeks to be a sustainable beauty brand with:

- Basic skincare good for daily use
- Products that offer increased satisfaction with repeated use
- Suitable configuration for both gift and personal use

Product Name

EREPH JEJU VOLCANIC BUBBLE PACK

Product Details

EREPH JEJU VOLCANIC BUBBLE PACK is a wash-off mask designed for rapid and effective management of pores, sebum, and skin

impurities. Upon application, the smooth cream formula transformations into active bubbles. This unique bubble-bursting process, combined with Jeju Volcanic Ash and Clay, works to adsorb and lift away deep-seated impurities.

Unlike traditional clay masks that can leave the skin feeling parched, this formula is specifically engineered to minimize post-wash tightness, ensuring a hydrated and refreshed finish.

Core Product Features

1. Advance Bubble control

- The formula features a "self-activating" mechanism where rich, soft bubbles naturally form and burst. This provides a multisensory experience visual, auditory, and tactile while effectively clearing pores. The distinct bubble formation makes it an exceptionally "instagrammable" product, ideal for social media content and demonstrations.

2. Soft and Hydrating Experience

- Gentle Application: The Cream to Bubble texture minimizes skin friction, allowing for a smooth, irritation-free application.
- Moisture Retention: Infused with Jeju Blossom, Green Tea Water, and Aloe Vera Leaf Extract to alleviate the dryness and "cracking" sensation typical of traditional clay masks.
- Barrier Friendly: Designed to overcome the common drawbacks of pore-clearing products by prioritizing hydration alongside deep cleansing.

3. Ultimate Convenience

- Rapid Routine: A complete deep-cleansing session in just 1 to 2 minutes, perfect for busy lifestyles.
- Hygienic Stick pouch: Pre-portioned 3g single use pouches ensure product freshness, prevent contamination, and offer effortless portability for travel or business trips.

Key Ingredients

- Jeju Volcanic Ash (Jeju, Korea): A porous material renowned for its superior ability to adsorb sebum and impurities. It is gentle on the skin, making it suitable for various skin types.
- Green Clay (France): Highly absorbent clay that cleanses the skin by removing excess oil and dead skin cells.
- Jeju Blossom (King Cherry Blossom): Known for its soothing properties to calm the skin during the cleansing process.
- Soothing & Hydrating Complex: Green Tea Water, Aloe Vera, and Eucalyptus: work together to maintain moisture and soothe the complexion.

- Conditioning Synergy: Sea Trumpet (Ecklonia Cava) and Tea Tree Extracts: support overall skin health and vitality.

How to Use

1. After cleansing, pat your face dry. Apply the contents of the pouch evenly, avoiding the eyes and mouth.
2. Gently massage (roll) the product onto the skin and wait for bubbles to form.
3. Once bubbles have fully formed and begun to burst, massage a second time and wait for a second layer of bubbles to emerge.
4. After the second bubble phase, rinse thoroughly with lukewarm water.

Market Analysis & Brand Value

Market Needs

- The current pore-care market shows high demand for solutions targeting rough skin texture, persistent blackheads, and whiteheads. While consumers recognize the need for pore management, many avoid traditional clay masks because they find them too drying, time consuming, or irritating. Furthermore, as the "Fast Home Care" trend grows, consumers are seeking products that deliver professional results in minutes. There is also a strong correlation between pore health and makeup performance consumers want products that prevent makeup from clumping or emphasizing pore texture.

The EREPH Solution

EREPH JEJU VOLCANIC BUBBLE PACK was developed to bridge these gaps by offering:

- Efficiency: A pore cleansing routine completed in under 3 minutes.
- Deep Adsorption: Active bubble technology for superior impurity removal.
- Hydration: A moist finish that eliminates the "tight" feeling after washing.
- Gentleness: A low irritation formula safe for sensitive skin types.

Marketing Highlights for Global Buyers

- "Jeju Heritage": Leverage the global reputation of Jeju Island for clean, premium ingredients.
- "1-Minute Pore Miracle": Appeal to the modern consumer's desire for high-speed skincare.
- "Multi-Sensory Content": Highlighting the bubble-popping sound and visual transition is highly effective for TikTok, Reels, and Shorts.

Company intro

KBIOMEDI Co., Ltd. is a specialized manufacturer and distributor of cosmetics and beauty devices, featuring its flagship brand 'SHALABS.' As the rapidly expanding beauty market shifts toward device-based care, the focus has evolved from “what to apply” to “how to deliver” effective results. SHALABS serves as a strategic bridge, expanding high-end medical aesthetic technology into the consumer and professional aesthetic markets, making professional-grade care accessible to all.

Product Name

SHA -1000 / 3000

Product Details

Innovative Needle-Free Drug Delivery System Unlike traditional invasive methods that inject ampoules or skin boosters using needles, our devices utilize solenoid pressure technology to deliver active ingredients directly into the dermal layer.

SHALABS - 1000: Designed for personal home care (B2C).

SHALABS - 3000: Designed for professional use (B2B), featuring specialized ampoules, adjustable intensity, and enhanced penetration depth.

Key Advantages of Non-Invasive Procedures:

1. Broad Marketability: Can be operated by non-medical professionals (e.g., aesthetic salons).
2. Low Entry Barrier: Short and easy training curve for practitioners.
3. Superior Patient Comfort: Significantly reduced pain and post-treatment swelling (embossing).
4. Cost Efficiency: Lower maintenance costs for devices and ampoules compared to medical-grade equipment.

Company intro

As a global leader in the pet lifestyle industry, our company delivers exceptional value to pet owners worldwide through our unique portfolio of brands, including Puppia, Pinkaholic, Olchi, and Catspia. We specialize in blending ergonomic engineering—tailored to a pet's natural movement and anatomy—with sophisticated design. This approach has allowed us to establish industry-standard harness systems and premium apparel lines, while our dedicated design research institute ensures continuous innovation in both functionality and safety.

By consistently participating in major international exhibitions such as Interzoo, we have built a robust global B2B network and solidified our presence as a hidden champion in the global market. Moving beyond mere manufacturing, our mission is to be a premier global partner that enriches the lives of pets and their companions through unparalleled quality and visionary service.

Product Name

Puppia Soft Harness

Product Details

The Puppia Soft Harness, which has set the global standard for pet walking gear, represents the pinnacle of ergonomic design focused on a dog's comfort and safety. Crafted from high-quality, breathable air-mesh material, it ensures a lightweight and cool experience in all seasons. Its flexible design wraps securely around the chest, effectively distributing pressure to prevent neck strain and respiratory discomfort, allowing for stable control during daily walks.

Our signature pattern technology allows for natural movement without restriction while maintaining exceptional durability. With its timeless aesthetic and a sophisticated palette of colors, the Puppia Soft Harness has become a beloved staple for pet owners worldwide. Developed and verified by our state-certified design research institute, this global bestseller transcends being a mere accessory; it is a premium solution that adds both safety and style to the bond between pets and their companions.

<https://www.medicosbiotech.com/>

Company intro

Medicosbiotech was founded in 2018 by a core team led by a board-certified plastic surgeon formerly affiliated with Yonsei University Severance College of Medicine and a professor of biotechnology at KAIST.

Medicosbiotech is dedicated to researching beautiful and healthy living through biotechnology. As life expectancy continues to increase, public interest in aesthetics and health is also growing. In response to these needs, Medicos Biotech strives to develop advanced technologies and innovative products through continuous research and development.

Medicosbiotech's core technology is skin tissue regeneration, which is applied to both intractable wound treatments—such as pressure ulcers and diabetic foot ulcers—and to a hair loss-relief cosmetic business based on scalp tissue regeneration.

The spider silk protein produced by Medicosbiotech is 3–6 times larger in molecular weight (150–300 kDa) than spider silk proteins (~55 kDa) produced using conventional platforms. This size is comparable to that of natural spider silk protein, and its physical properties are significantly superior, increasing proportionally with molecular size.

In addition, Medicosbiotech has developed a proprietary microbial strain with a production capacity approximately ten times higher than the previously reported maximum yield (1.5 g/L). The company has also secured fermentation, scale-up, and downstream purification technologies. Based on these technological capabilities, Medicosbiotech is developing Cure Silk, an advanced therapeutic material for the treatment of intractable wounds.

Product Name

Dr.GRAFT Scalp Shampoo

Product Details

Dr.GRAFT Scalp Shampoo is a functional anti-hair loss shampoo developed by Medicosbiotech. It contains the patented ingredient MCB-Formula™, which helps support the growth of dermal papilla cells and promotes a healthy scalp environment, along with functional ingredients officially notified by the Korean Ministry of Food and Drug Safety (MFDS). Clinical testing confirmed improvements after 2 weeks of use in scalp exfoliation, scalp hydration, scalp redness, hair root volume, and hair breakage. By focusing on the telogen and shedding phases of the hair growth cycle, the shampoo helps minimize hair loss. Formulated with a mildly acidic pH 5.5, it contains six plant-derived ingredients to help reduce scalp irritation. The formula is free from harmful ingredients and has completed a low-irritation test, making it safe for use by the entire family. The product has been registered with major cosmetic regulatory systems, including CPNP and the FDA, ensuring safety, reliability, and trust in both domestic and international markets.

pitterpetter.com

Company intro

Pitter Petter is a pet-tech startup that provides genetic testing services for companion animals, including screening for hereditary diseases, tumor diagnostics, and DNA-based individual identification, leveraging genomic testing and biotechnology.

Product Name

DOGMA

Product Details

DOGMA is a genetic testing service that helps assess a dog's risk for hereditary diseases. It is a contactless, at-home care service: pet owners can purchase a kit online and easily collect their pet's DNA sample at home for testing. Based on the results, the service provides guidance by predicting the pet's innate genetic disease risks and the likelihood of developing certain conditions in the future.

Genetic tests that research institutions typically perform at a cost of about KRW 50,000–70,000 per item are offered by Pitter Petter at a significantly lower cost. By custom-ordering a tailored genotyping microarray chip, Pitter Petter can test for multiple hereditary conditions at once—detecting whether the dog carries genetic variants associated with a total of 99 hereditary diseases—reducing testing costs by up to 90% compared to conventional methods.

Company Requirements

Prospective buyers interested in adopting companion animal genetic testing, veterinary hospitals/clinics, pharmaceutical companies, and insurance companies, etc.

Company intro

COSPLAN Inc. is a firm dedicated to the research, development, and commercialization of innovative micro-skin stimulators. In 2019, we introduced the derma cosmetic brand DERMATHOD. 'Creative, Consumer, and Cosmetics' Leveraging cutting-edge technologies and expert research capabilities, COSPLAN offers tailored Skincare solutions through diverse avenues, including brand partnerships, product development, and OEM services. In addition to product creation, we offer comprehensive consulting and execution services that encompass the entire process, from planning and formula development to design and production, all of which align with the brand's philosophy and market demands. Through research grounded in scientific skin mechanisms and clinical data, we offer consumers healthy and sustainable skin care solutions while delivering differentiated product competitiveness to brands. COSPLAN creates products by means of innovative product development and clinical testing, grounded in comprehensive research. We have specifically developed a product line that enhances the synergistic effect when used in conjunction with DERMATHOD's flagship product, DERMA EZ JET (a Medical-grade polymer needle ampoule-integrated skin stimulator), while also establishing our own distinctive brand offerings. To enhance our international competitiveness, we are consistently engaging in a variety of overseas exhibitions and steadily elevating our brand recognition on the global stage as a K-aesthetics brand. It has firmly established itself as a brand garnering attention in the international aesthetic market.

Product Name

DERMA EZ JET Multi Effector Ampoule

Product Details

DERMA EZ JET is a skin stimulator(MTS) with a built-in ampoule. And it is designed to deliver nutrients deep into the skin.

Users can adjust easily the microneedle length from 0.15mm to 0.25mm.

- 0.15mm is painless and good for beginners of MTS.
 - 0.25mm is good for professionals and masters of MTS, and intensive concerned areas on the skin.
- The Multi Effector Ampoule is formulated with 10% EGF, nano-collagen peptides, and a blend of hyaluronic acid to strengthen the skin's barrier and improve free radical damage, resulting in more resilient and healthy skin.

Company intro

PLAN de G is a high-end derma-cosmetic brand that combines skin-friendly, naturally derived active ingredients with proprietary fermentation and microbiome technologies to deliver fundamental skin transformation. Built on the values of Green (Nature), Global (Worldwide Vision), and Generations (Timeless Trust), the brand represents a sustainable premium skincare philosophy for all age groups. PLAN de G identifies skin ecosystem imbalance—rather than simple moisture or nutrient deficiency—as the root cause of modern skin concerns. Based on this insight, the brand has developed a clean derma solution that strengthens the skin's natural defense and recovery systems. Its high-performance all-in-one design, eliminating unnecessary steps, delivers both superior efficacy and user convenience. The brand's formulation expertise incorporates Pro-Xylane, alongside fermented Camellia PDRN and GABA (10,000 ppm each), combined with natural Lucinol, EGF, Glutathione, Moringa-derived amino acids, and B-complex vitamins. These carefully selected actives are blended using proprietary processes to ensure high performance and stability. The lineup includes an all-in-one cleanser, PDRN-GABA serum and cream, and the Mela Mute Brightening Fluid. Each product performs effectively on its own while offering enhanced synergy as a complete ritual—supporting premium positioning, higher average order value, and strong repeat purchase potential.

Product Name

[PLAN de G] Triple All-in-one Oil to foam Cleanbeauty Cleanser

Product Details

[PLAN de G] Triple All-in-one Oil to foam cleanbeauty cleanser is a revolutionary oil-to-foam cleanser that first dissolves makeup with oil ingredients and then transforms into a foam when water is added, providing a thorough triple cleansing in one step. It is designed to function as an eye & lip makeup remover, soft exfoliating gel, massage gel, cleansing lotion, cleansing oil, and cleansing foam all in one.

Known for its excellent cleansing power, this product leaves the skin feeling clean without any tightness after washing. PLAN de G's patented ingredients, including Camellia flower lactobacillus ferment extract, 6 types of vitamin B, 11 types of amino acids, watermelon, apple, Centella Asiatica, Portulaca Oleracea, and 3 types of hyaluronic acid, contribute to healthier skin even during the cleansing process.

Company Requirements

Aesthetic/clinic skincare distributors interested in expanding into high-end derma-cosmetics.

Company intro

POLED is founded by the researchers who had been working on automotive safety technology at Hyundai Motor for over 10 years. By starting business as an in-house venture of Hyundai Motor, POLED ensures the safety of all children in the world with the heart of a father. Thanks to fathers' unwavering commitment to safety-oriented design, POLED continuously provides safe and innovative products, and services to customers worldwide, leading the premium baby products industry. POLED prioritizes baby safety and safety-oriented design with four brands: Poled Safety, Poled Airluv, Poled Pixel and Poled Home.

Product Name

Poled Airluv4 Baby Cooling Stroller/Carseat Liner

Product Details

Airluv is a baby cooling seat, or liner, specially developed by our in-house R&D department. its material and special fan keep your child's back cool, dry and soft. With fan attached at the bottom part of the seat, Airluv inhales air into the seat and exhale through ergonomically designed air holes. So, it can keep our children's back from sweata and maintain moderate temperature for our children in the car, at home, outside, everywhere. Its feature turns hot, cramped and uncomfortable strollers and car seats into comfortable and pleasant spaces for your baby. Its design is also recognized in the global market, as it won the internationally prestigious IF Design Award in the first quarter of this year.

Company intro

Laurenchoo Company is a food tech company driving innovation in the food and beverage sector for a healthy lifestyle. We minimize harmful ingredients such as alcohol, sugar, and salt, and craft functional non-alcoholic drinks using plant-based ingredients and locally sourced raw materials from Korea.

Product Name

Chooper Bubbly Peach Sangria

Product Details

Chooper Bubbly Peach Sangria is not a juice-based beverage, but a true non-alcoholic wine made from real wine.

It begins with carefully selected Spanish red wine, which is gently concentrated before only the alcohol is delicately removed, preserving the wine's original aroma, structure, and depth of flavor.

The addition of fragrant peach notes and refreshing carbonation creates a lively, well-balanced profile—

light and vibrant, yet unmistakably wine-like.

Each sip delivers a sparkling sensation, as if flavors gently burst on the palate, offering a joyful and refined drinking experience.

Perfect for vacations, camping trips, housewarmings, and social gatherings,

Chooper Bubbly Peach Sangria is a premium non-alcoholic party wine that everyone can enjoy—without the burden of alcohol.

Its taste and quality have been internationally recognized.

In 2024, Chooper Bubbly Peach Sangria achieved an exceptional triple win at the World Drink Awards (NO & LOW category), earning World Best, Category Winner, and Gold, and was named one of the world's finest non-alcoholic wines.

The same year, it received Bronze in the NO & LOW category at the International Wine & Spirit Competition (IWSC)—marking Korea's first-ever win at both competitions.

It was also awarded Silver Winner at the 2024 Global Wine Masters, and went on to receive Gold at the 2026 Monde Selection.

More than just an alcohol-free alternative,

Chooper Bubbly Peach Sangria delivers the true pleasure and atmosphere of wine—without alcohol.

A premium non-alcoholic wine designed for moments worth savoring.

Company intro

Since its establishment in 2008, Livingicon Inc. developed a TPU material cutting board, which can be boiled for sterilization, based on its own patent in 2009. The company has been exporting cutting boards to various countries such as Germany, Switzerland, Japan, Vietnam and Singapore by participating in Ambiente, an international trade fair in Germany, for 13 consecutive years. Consistently developing products, the company is striving to strengthen and grow its brand. It operates the kitchenware brand 'SalleMa' and the tableware brand 'Mayfair'.

Product Name

Macaron TPU Cutting Board Set

Product Details

[Product Features]

- Inspired by macaron, offering nine warm and soft colors with harmonizing curves.
- Patented Design: Suitable for boiling-water sterilization (up to 150°C for 30 seconds) and dishwasher safe (up to 80°C).
- High Resilience of TPU Material: Significantly reduces surface damage from knife cuts; helps prevent cross-contamination and color staining; absorbs wrist impact and reduces noise.
- Flexibility: Unlike wooden or plastic cutting boards, the board can be bent to easily transfer ingredients.
- Certified & Tested: Compliant with FDA, SVHC, RoHS, and LFGB standards; passed tests for heat resistance, material migration, and heavy metal content.
- Eco-Friendly & Recyclable Material: Made from environmentally friendly, recyclable materials.
- Award-Winning Product: Winner of the Seoul Awards 2024 (Seoul Business Agency).

Company intro

The Seoul Agro-Fisheries & Food Trade Association was established in 2016 in partnership with the Seoul Agro-Fisheries & Food Corporation to accelerate the export of agricultural products and support the global expansion of Korea's leading food enterprises.

As a collaborative body comprising wholesale distributors, exporters, and manufacturers, the Association develops competitive export models backed by a stable supply chain and a professional distribution network.

We actively introduce high-quality K-FOOD to international markets through strategic exchanges with overseas wholesale markets, partnerships with global e-commerce platforms, and dedicated buyer consultations. Beyond product sales, the Association is committed to promoting the rich heritage of Korean food culture worldwide.

Since its inception, the Association has consistently expanded its network within the Seoul metropolitan area, achieving steady growth across diverse categories—including fresh produce, red ginseng supplements, alcoholic beverages, meat products, and sauces. Moving forward, the Seoul Agro-Fisheries & Food Trade Association will continue to strengthen its role as a strategic partner, driving the global success of Korean food companies through robust public-private cooperation.

Product Name

YAKDOYA

Product Details

A modern reinterpretation of traditional Yakgwa, this snack delivers a rich, chewy, and sweet donut-like taste.

It features a soft and moist donut texture, finished with a crispy breadcrumb coating for added crunch and enjoyment.

With its satisfying texture and fullness, it works well as a convenient meal replacement and pairs perfectly with coffee or milk as a daily snack.

Ideal for offices, school cafeterias, cafeterias, and convenience stores, it is easy to display and sell across a wide range of channels.

Company Requirements

A wholesale purchaser dealing in agricultural products, seafood, sauces, alcoholic beverages, kimchi, and red ginseng foods

Company intro

E&L International Co., Ltd. is a food-specialized company established in 2011, primarily engaged in the development, manufacturing, distribution, and export of all-purpose powdered sauces, seasonings, and HMR products. The company owns its proprietary brand, God Sauce, which focuses on powdered all-purpose seasoning products applicable to a wide range of dishes, including meat, seafood, and noodle-based foods. Based on the God Sauce product concept, the company has also expanded its product lineup through the God Chef brand, offering diversified seasoning and food solutions. With global market expansion as a core strategy, E&L International has continuously strengthened its overseas distribution networks and has been officially recognized for its export competitiveness through awards such as the USD 7 million Export Tower and selection as a Global Hidden Champion. In addition, the company has established a stable domestic and international supply system by meeting overseas certification requirements for its products and production facilities.

Product Name

God Sauce (Levels 1·2·3)

Product Details

(1-E)God Sauce (Levels 1·2·3)

A versatile powdered seasoning sauce that allows anyone to easily create authentic Korean spicy flavors. Made with chili powder and vegetable powders, it can be sprinkled or mixed into dishes. Available in mild, medium, and hot levels. MSG-free, suitable for meat, seafood, noodles, soups, and more. Powder form allows long shelf life and room-temperature storage, convenient for restaurants, home use, and outdoor cooking.

Company Requirements

We are seeking business meetings with overseas chefs (including Korean and fusion cuisine), foodservice franchises, food-related companies, food ingredient wholesalers and retailers, as well as Asian and Korean specialty food distribution channels interested in introducing Korean-style spiciness through God Sauce products. God Sauce is a powdered seasoning developed to deliver consistent Korean flavors, offering practical advantages such as ease of application, ambient storage, and a relatively long shelf life, which make it suitable for foodservice operations and distribution. Based on these product characteristics, we are open to discussions on product tastings, menu application tests, pilot distribution, and phased market introduction. We provide a range of product application recipes through our official website and have prepared marketing materials and product information that can support evaluation and collaboration according to different markets and channels.

Company intro

Judangui Bigyeol is a functional food brand specializing in alcohol-related and daily condition management, developing and distributing products in various formats such as beverages, tablets, and gummies.

Based on a deep understanding of domestic consumer usage environments and intake convenience, the company offers practical, repeat-purchase products through differentiated formulations and functional ingredient combinations.

Currently, Judangui Bigyeol is expanding its sales through domestic convenience stores, online platforms, and B2B distribution channels. Looking ahead, the company plans to gradually expand exports by introducing product lineups tailored to local consumption patterns and by establishing partnership-based distribution strategies in overseas markets. Rather than focusing on short-term trends, Judangui Bigyeol aims to become a brand embedded in consumers' daily condition management routines and continues to advance its products while preparing for global market entry.

Product Name

Judang Bigyeol Tablets

Product Details

Judang Bigyeol Tablets are premium tablet-type products developed for post-drinking and daily condition management. Formulated with functional ingredients such as succinic acid, glucose, and glycine, the tablets are designed for convenient intake in a compact form. Manufactured in HACCP and GMP certified facilities, ensuring quality and safety.

Company Requirements

- Overseas distributors specializing in functional foods and functional beverages
- Consumer goods buyers with convenience store, drugstore, or online retail channels
- Partners capable of private label distribution or exclusive local distribution
- Buyers open to test launches followed by gradual volume expansion

Company intro

Greetings. We are CHAEUM F&B Co., Ltd. We are a premium food company dedicated to infusing daily life with the vitality of nature and realizing a "healthy transformation that begins at the dining table."

1. Our Philosophy: "Farm to Table, the Value of Nature Itself"

At CHAEUM F&B, our philosophy is clear: delivering the gift of nature's raw materials to consumers without compromising their inherent value. Our slogan, 'Farm to Table,' goes beyond mere sourcing; it encompasses the entire process of maintaining healthiness through optimal processing methods that prevent nutrient destruction. By removing unnecessary additives and filling our products with the original taste and nutrition of the ingredients, we embody the heart of our brand, 'FRESH FARM.'

2. Product Excellence: "Uncompromising Quality & the Essence of Organic"

Our flagship products are additive-free fruit and vegetable juices. Every product in our lineup undergoes rigorous quality control.

Sourcing Certified Organic Materials: We use only high-quality organic ingredients strictly selected from world-renowned origins.

NFC (Not From Concentrate) Method: We do not mix water with concentrates. Instead, we cold-press the raw ingredients to preserve the freshness and flavor of a just-harvested crop.

Guaranteed Safety: Our meticulous hygiene processes, compliant with international food safety standards such as HACCP, instill deep trust in both buyers and consumers.

3. Business Strengths: "Experienced Partner & Global Consultant"

CHAEUM F&B is more than just a manufacturer; we are a strategic partner for your success.

One-Stop OEM/ODM Service: Based on years of expertise, we provide customized solutions tailored to our clients' needs, from raw material sourcing to product planning, design, and manufacturing.

Global Network & Distribution Expertise: With a deep understanding of the global market as well as major domestic distribution channels, we possess strong export competitiveness. We are a competent collaborator ready to expand your business.

We believe that honest food makes the world a brighter place. We are confident that our products, filled with the healthiness of nature, will breathe new life into your business. We invite you to experience the difference firsthand at our booth during the exhibition.

Product Name

Carrot & Apple Juice, Kids' Juice, Strawberry Juice, Berry Berry Juice, Pear, Bellflower & Quince Juice

Product Details

1. Core Product Lineup Our products cater to all age groups and perfectly satisfy diverse market needs.

Apple & Carrot Juice: A steady seller that captures both flavor and nutrition (Beta-carotene) through a golden ratio blend.

Kids' Juice: A dedicated line for children, designed specifically for their palates and meeting the strictest safety standards.

Strawberry Juice: The essence of fresh and trendy flavors, boasting the highest preference across all demographics.

Berry Berry Juice: A beauty and wellness juice packed with powerful antioxidant energy from various berries.

Pear, Bellflower & Quince Juice: A functional beverage specializing in respiratory health, infused with the wisdom of traditional Korean ingredients.

2. Premium Raw Materials Quality is our non-negotiable first principle.

100% Additive-Free Principle: We ensure the pure, original taste of ingredients by never using sugar, synthetic flavors, preservatives, or artificial colors.

Strict Source Management: We maintain consistent quality by directly tracking and managing every step from raw material sourcing to warehouse entry.

3. Advanced Processing We possess the top-tier technology to deliver products in their freshest state to consumers.

Low-Temperature Pasteurization: We minimize heat treatment to preserve heat-sensitive vitamins and enzymes as much as possible.

HACCP Certified Manufacturing: All processes are safely managed in state-of-the-art hygienic facilities that have earned international HACCP certification.

4. Quality Certification

Quality Certification for Children's Favorite Foods: A national guarantee that the product is nutritious and safe for children to consume with confidence.

2024 & 2025 Seoul Awards Winner: A prestigious brand mark recognizing "Excellent Small & Medium Enterprise Products" certified by the Seoul Metropolitan Government.

5. Business Advantage We are more than just a manufacturer; we are a partner dedicated to your business success.

One-Stop OEM/ODM Solution: We provide customized services for the entire process, including product planning, recipe development, package design, and production.

Proven Market Competitiveness: We possess brand recognition and sales data proven in Korea's major distribution channels and online markets.

Global Logistics Optimization: Our export-optimized packaging and logistics processes ensure a stable supply to any destination worldwide.

"CHAEUM F&B's products, filled with the healthiness of nature, will bring new vitality and strong profitability to your business."

Company intro

ESCORPORTATION with us in precious moments We were created to provide the speciality of being able to convey our hearts beyond just objects. Our beginning began with a small change that made ordinary daily life shine even more. I really want to capture practical and beautiful values in my life, And the passion to convey that sincerity to customers made ESCORPORTATION today.

Product Name

Grinding sesame seeds

Product Details

This is an electric sesame grinder equipped with a dedicated ceramic burr system specifically engineered for grinding sesame seeds. Due to their small size and high oil content, sesame seeds can be difficult to grind evenly using conventional salt and pepper grinder mechanisms, often resulting in clogging or inconsistent performance.

This product incorporates a ceramic burr design tailored to the unique characteristics of sesame seeds, enabling stable and uniform grinding performance. It features a USB-C rechargeable system for convenient operation, and the lower grinding unit is detachable and washable for hygienic maintenance. An integrated LED light automatically illuminates during operation, allowing for easy use even in low-light environments. The adjustable grind setting at the base enables intuitive control over the particle size, making it suitable for a variety of culinary applications.

The product has been developed with scalability in mind, particularly targeting expansion into markets with high sesame consumption, such as China and Japan.

Company intro

MathMaster Co., Ltd. develops Math Friends, an elementary arithmetic learning app designed to help children enjoy mathematics. With the mission of helping children around the world grow to love math, the company continuously provides engaging educational content and services. Math Friends learning content has been supplied to Ice Cream Home-Learn, and the service is distributed through major online platforms such as S2B (the public school-exclusive marketplace), Naver Store, and Gmarket. The product has been adopted by approximately 800 elementary schools nationwide, achieving cumulative sales of KRW 9.8 billion and serving around 250,000 customers. Monthly active users: 250,000

Elementary schools using the service nationwide: Approximately 800

Product supplied to Ice Cream Edu Co., Ltd., a mid-sized education company with annual revenue of KRW 100 billion

Textbook business collaboration underway in 2025 with Ice Cream Media Co., Ltd., a textbook publishing company with annual revenue of KRW 140 billion

Product Name

Math Friends

Product Details

Math Friends is an AI-powered elementary mathematics learning application designed to support foundational math education for elementary students and to serve as an effective learning tool for educational institutions.

By analyzing learning data, Math Friends provides personalized learning paths tailored to each student's level and progress. Through engaging, game-based content, the platform helps strengthen core mathematical skills while fostering self-directed learning habits. Currently, Math Friends is distributed through S2B (the official school marketplace in Korea) as well as major online platforms such as Naver Store and Gmarket. The service has been supplied to approximately 800 elementary schools nationwide, achieving cumulative revenue of KRW 9.8 billion and serving over 250,000 customers.

Company Requirements

We seek to explore business expansion and collaboration opportunities by networking with buyers and institutions involved in digital education for elementary school students aged 8–13.

edutech companies: Digital education technology startups and companies

Education companies that operate their businesses using tablet PCs and other digital devices

Educational institutions: Elementary schools, private academies, and education-related organizations

Institutions actively promoting and implementing digital education policies

Government agencies related to education: Government officials responsible for education policies and programs

Government stakeholders driving and supporting digital education initiatives

Company intro

Empowering the Future of Education and Sustainable Technology

AHA Co., Ltd. is a global leader in the Edutech, Healthcare, and EV Charging sectors, dedicated to delivering innovative, eco-friendly, and high-performance solutions. With a dominant 40% market share in the Korean public procurement market, we are expanding our global footprint through cutting-edge R&D and strategic international manufacturing.

1. Edutech: Advanced Interactive Displays

The global interactive flat panel (IFPD) market is evolving towards high-performance and digital transformation. AHA leads this shift with:

Next-Gen Visual Technology: Integration of Local Dimming and QLED for superior color accuracy and high-efficiency performance, achieving 20–40% energy savings.

Unmatched Performance: Industry-leading 50-point multi-touch, sub-2ms response time, and Zero-Gap ultra-slim IR touch technology.

Global Standards: Our products are EDLA certified (Android-based) and Energy Star certified, meeting the highest global requirements for ESG and software compatibility.

Smart Features: Equipped with up to 17 AI-driven functions, optimized for the modern AI classroom.

2. Healthcare: High-Performance Air Sterilization

Addressing the global demand for safety in public, educational, and medical facilities, AHA offers:

Proven Sterilization: Patented MSPT (Multi-Stage Plasma Technology) with 99.9% sterilization (TÜV certified).

Sustainable Design: A 9-stage purification system with a washable filter structure, significantly reducing maintenance costs while decomposing over 97% of formaldehyde (HCHO).

3. EVC: Smart EV Charging Infrastructure

As the global EV market accelerates, AHA provides certified, reliable charging solutions:

Proprietary Technology: Features like Plug & Play auto-addressing, load-responsive control, and advanced fire prevention algorithms.

International Compliance: Fully supports OCPP and ISO15118 standards, with certifications from CE, TÜV, and ISO for seamless global integration.

Strategic Global Expansion

Supply Chain Resilience: We operate a Multi-Sourcing System for panels and electronic components to ensure stable supply despite market fluctuations.

Global Manufacturing Hub: Following our success in Korea and Japan, we will establish a new production corporation in Uzbekistan by late 2026. This hub will serve as a gateway to the CIS region, enhancing our price competitiveness and global market dominance.

AHA Co., Ltd. is your trusted partner for sustainable growth and technological excellence. We look forward to exploring synergy and partnership opportunities during this exhibition.

Product Name

Interactive Flat Panel Display

Product Details

AHA Co., Ltd. is a leading Edutech innovator, holding the No. 1 position (40% market share) in the Korean public procurement market, powered by over 20 years of proprietary touch technology.

Our interactive displays feature QLED panels and Local Dimming technology, delivering vivid, high-fidelity visuals while achieving 20–40% energy savings compared to conventional models. With Zero-Gap ultra-slim IR touch technology, we provide an industry-leading response time of under 2ms, offering a natural writing experience as precise as pen on paper.

As a Google EDLA-certified solution, our displays allow seamless and secure access to the latest Android ecosystem and educational apps. Furthermore, equipped with up to 17 AI-driven functions, they are perfectly optimized for smart classroom environments.

By maintaining a Multi-Sourcing System, we have minimized supply chain risks. Starting with the establishment of our Uzbekistan production plant in 2026, we aim to supply these high-quality products at competitive prices to the CIS and Middle East markets. AHA is your ultimate partner for digital transformation in education and business.

Company Requirements

1. Strategic Regional Hubs: Professional Distributors in CIS & GULF Regions Partners with a strong regional presence capable of maximizing the logistics and cost advantages of our Uzbekistan manufacturing plant.
CIS Region (Kazakhstan, Kyrgyzstan, etc.): Local major consumer electronics/IT distributors who can directly benefit from duty-free advantages and reduced logistics costs due to proximity to our Uzbekistan facility.
Middle East & GULF Region: Partners with established channels in public institutions and Ministries of Education in countries with active infrastructure investments, such as Saudi Arabia (e.g., NEOM project) and the UAE.
2. Technical Service Excellence: Partners with Installation & Maintenance (A/S) Infrastructure AHA seeks partners who can go beyond simple sales to provide integrated installation and after-sales support for IFPDs and EV chargers.
SI (System Integration) & Engineering Firms: Technology-based partners with experience in large-scale display installation or those capable of handling EV charger installation and power facility management.
3. Strategic Buyers by Industry
 - Edutech: Government procurement vendors and large private school foundations participating in 'Digital Classroom Projects' led by the Ministry of Education (MOE) of each country.
 - Electric Vehicle (EV): Developers of new residential/commercial complexes, state-owned gas station chains (for EV charging conversion), and fleet operators (taxi/logistics companies).
 - Healthcare: Solution providers for the integrated management of public facilities used by large crowds, such as hospitals, airports, and large shopping malls.

Company intro

A personalized sleep-care platform enhancing sleep through real-time AI-powered biometric analysis.

Product Name

For Me Buds

Product Details

For Me Buds are sleep and wellness earbuds that combine heart rate-based biometric tracking, AI-powered analysis, and scientifically engineered sound technology.

They track heart rate in real time during sleep to analyze sleep quality and patterns, providing personalized sleep insights through a mobile app.

With Dynamic Binaural Beats audio technology and hybrid Active Noise Cancelling (ANC), For Me Buds help users effectively enter states of deep sleep, meditation, and focus.

A variety of soundscapes further block external noise and create a calm, stable sleep environment.

Designed with an ultra-lightweight, low-profile form factor, the earbuds are comfortable even for side sleepers.

For Me Buds offer an integrated wellness solution with three modes - Sleep, Meditation, and Focus - in a single device.

Company Requirements

Buyers operating in the sleep, wellness, or smart home sectors, with interest in AI-powered healthcare devices and IoT solutions.

Partners capable of distributing integrated sleep and smart environment solutions are preferred.

Company intro

“The On IT” Company is a leading provider of comprehensive IT solutions specializing in Kiosk, POS, and Palm Vein Recognition technology. With our own corporate R&D center, seven regional branches, and a dedicated 365-day call center, we deliver advanced automation solutions tailored for the F&B, Retail, and Fitness industries.

Product Name

VPASS KIOSK & Membership Solution

Product Details

[Business Proposal: Palm Vein Biometric Kiosk & Management System]

Core Technology & Access Control

Palm Vein Biometric Authentication: Features a high-speed AI recognition system that authenticates users in under 0.5 seconds, with an exceptional accuracy rate (False Acceptance Rate of 1 in 100 million).

Smart Access Management: Supports store entry control based on membership tiers, allowing specific restrictions by time and day.

Guest Support: Supports QR code entry for non-members and temporary visitors.

Real-time Security Integration: Fully integrated with electronic door locks to ensure only authenticated members can access the premises.

Inclusive Design & Accessibility (Universal Design)

Certified Accessibility: Awarded Grade 1 in the KS-9211 (Accessibility for Unmanned Information Terminals) by Korean national agencies.

User-Friendly Features: * Voice Guidance for the visually impaired and elderly.

Low-Vision Mode (High contrast and scalable UI).

Physical Keypad for tactile operation and enhanced usability.

Hardware & Customization

Versatile Form Factors: Standard 21.5-inch kiosks, as well as compact 11-inch wall-mount or tabletop versions.

Custom Manufacturing: Bespoke hardware design and manufacturing are available to meet specific client requirements.

Management Software & Automation

Integrated Management System: A comprehensive software solution for digitized store operations and automated customer management.

Target Sectors: Optimized for Fitness Centers, Residential Community Facilities, and Private Unmanned Retail Stores.

Company Requirements

We are seeking business partners and buyers to promote our hardware and software solutions, featuring biometric-based access authentication and payment kiosks, along with integrated membership programs for the fitness, F&B, and retail sectors

Company intro

Arcontek is a leading expert company in Korea, specialized in AFCI/AFDD which prevents electric fire and has the largest market share in Korea.

Electric fires can still occur even with conventional ELCBs(Earth Leakage Circuit Breaker) or MCCBs(Moulded Case Circuit Breaker). These conventional circuit breakers do not detect dangerous electric spark (arc) accidents which is the main cause of electric fires. ELCBs detect to electric leakage to prevent electric shock accident, and MCCBs detect overload to protect electric devices, but Arcontek's Smart AFCI / AFDD detects not only electric leakage and overload but also hazardous arc faults, which the conventional circuit breakers do not detect. This is the state-of-the-art electrical safety device to prevent not only electric shock but also electric fire.

This innovative product has 4 certificates of the highest technology in Korea issued by the government - (1)Certificate of Excellent Product of Public Procurement Service, (2)Certificate of New Excellent Product of Ministry of Trade, Industry and Energy, (3) Certificate of Quality of Ministry of SMEs and Startups , and (4)Certificate of Disaster Safety Product of Ministry of the Interior and Safety.

spm.works

Company intro

SPM is a computer peripheral brand based in Seoul, South Korea, offering a diverse product lineup including keyboards, switches, and mice. We have become a beloved brand in Korea by focusing on original in-house designs, sophisticated color palettes, the application of the latest technology, and providing the ultimate typing experience—the very essence of a keyboard. In particular, we share our brand's unique and original sensibility with users worldwide through beautiful native Korean product names such as 'Mirinae' and 'Moksae'.

Product Name

PN06 LOOMI Keyboard

Product Details

This is an SPM original-design full aluminum keyboard. It features a gasket mount for a soft and comfortable typing feel, and comes equipped with HMX Moksae low-noise linear switches as standard, delivering quiet, stable keystrokes and a plush, semi-silent sound signature. The ball-catch and pogo-pin structure allows for easy, tool-free disassembly and reassembly, and it supports VIA-based customization.

www.4fact.co.kr

Company intro

4FACT Co., Ltd. is a professional body camera manufacturer founded in 2020, achieving continuous and stable growth in the security and safety device industry.

4FACT supplies body camera solutions to a wide range of leading corporations, including Hyundai Engineering & Construction, Hyundai Engineering, Samsung C&T, SK hynix, Hyundai Motor Company, and HD Hyundai Samho. In addition, our products are actively deployed across various public institutions such as the Ministry of Justice, the Presidential Security Service, police agencies, fire departments, and local governments.

Notably, all workers across Hyundai Engineering & Construction sites are currently equipped with 4FACT body cameras, with approximately 50,000 units already deployed nationwide.

Our LTE-enabled real-time streaming body camera, LIVE ST20, has been utilized for large-scale crowd monitoring, including the Yeouido Hangang Fireworks Festival in 2024 and 2025. It has also been deployed in high-profile international events such as the Korea-Africa Summit and APEC meetings, demonstrating its reliability in critical security environments.

4FACT continues to engage in ongoing discussions with major corporations and public organizations for body camera adoption, while actively creating new business opportunities in collaboration with leading telecom companies such as SK Telecom and LG U+.

Beyond body cameras, 4FACT is expanding its business portfolio to include action cameras, helmet Bluetooth devices, motorcycle dash cams, in-vehicle devices, game controllers, and keyboards—steadily growing as a comprehensive digital device brand.

Guided by a customer-centric philosophy, 4FACT is committed to delivering superior quality products at reasonable prices, striving to provide the highest level of satisfaction to our partners and customers.

LIVE ST20 – LTE Real-time Body Camera

- Battery: 3,000mAh (replaceable)
- Waterproof: IP67
- Resolution: Up to 2K / 1440P / 25FPS
- Recording Time: Approx. 10 hours
- Features:
 - Supports microSD up to 512GB
 - 130° wide-angle lens
 - Live streaming up to 1K FHD (4G up to 5.5 hrs)
 - RTSP streaming with simultaneous recording & audio
 - Night vision (infrared) / Voice recording
 - Flashlight / Warning light / Laser pointer
 - 3.1-inch touchscreen

NT20 – Nametag Body Camera

- Battery: 1,800mAh
- Waterproof: Splash-resistant
- Resolution: Up to 2K / 1296P / 30FPS
- Recording Time: Approx. 8.5 hours
- Features:
 - Built-in memory
 - Pin clip & magnetic mount
 - Dedicated mobile APP (Korean)
 - Voice recording
 - Ultra-lightweight design

Y10 – Compact Body Camera

- Battery: 1,501mAh
- Waterproof: IP66
- Resolution: Up to 1080P / 25FPS
- Recording Time: Approx. 7.5 hours
- Features:
 - Supports microSD up to 512GB
 - 130° wide-angle lens
 - Night vision (infrared)
 - Pre-recording & delayed recording
 - Voice recording
 - 2-inch display

- Flashlight / Warning light
- File lock function

Y20 – Standard Body Camera

- Battery: 2,500mAh
- Waterproof: IP67
- Resolution: Up to 2K / 1296P / 30FPS
- Recording Time: Approx. 10 hours
- Features:
 - Supports microSD up to 512GB
 - 130° wide-angle lens
 - Night vision (infrared)
 - Pre-recording & delayed recording
 - Voice recording
 - 2-inch display
 - Flashlight / Warning light

RT20 – Versatile Body Camera

- Battery: 2,200mAh
- Waterproof: IP65
- Resolution: Up to 2K / 1296P / 30FPS
- Recording Time: Approx. 9.5 hours
- Features:
 - Built-in 64GB memory
 - 180° rotatable lens
 - Night vision (infrared)
 - Delayed recording / Loop recording
 - Motion detection / Thumbnail preview
 - Vehicle mode support
 - File protection & Password mode
 - 1.33-inch display

HC01 – Helmet-mounted Camera

- Battery: 2,600mAh
- Waterproof: IP67
- Resolution: Up to 1080P / 30FPS
- Recording Time: Approx. 10.5 hours
- Features:
 - 115° wide-angle lens
 - Sony STARVIS image sensor
 - Dedicated mobile APP (Korean)
 - Loop recording
 - 360° ball mount design
 - Mounting options: helmet, side mirror, handlebar (mount kit included)

Company intro

We specialize in plastic-related materials including plastic resins, compounding, glass fiber, and composite materials, supported by in-house material design and formulation capabilities and collaboration with global top-tier manufacturing partners. From material development to composite application, mass production, and export, we provide end-to-end solutions that enhance performance while ensuring cost competitiveness.

Product Name

Plastic Resins and Compounded Composite Materials

Product Details

This product line covers a wide range of plastic-based materials including plastic resins, compounded materials, glass fiber reinforced plastics, and short/long fiber composites. Designed for automotive, battery, home appliance, and electrical & electronics applications, we provide customized material solutions based on formulation expertise and ensure stable mass production through collaboration with global manufacturing partners.

Company intro

We are window film company Erumi Korea
Introduction: Erumi Korea makes window film, which helps control the temperature indoors by blocking heat from the sun. It's great for saving energy and making indoor spaces comfortable and safe.

Background: More people want eco-friendly building materials, especially for projects focused on carbon neutrality and green construction. Window films used to be mainly for offices, but now they're popular for homes too, especially in apartments with balconies.

Major Window Problems: Windows can cause a lot of problems:

- They let heat escape, leading to energy loss.
- Sunlight can make rooms hot and increase cooling costs.
- Harmful UV rays can damage skin, eyes, and indoor items.
- Broken glass can cause accidents, especially during natural disasters.

Key Features of Window Film: Window film helps by:

- Saving energy by blocking heat and reducing heating and cooling costs.
- Protecting against UV rays to prevent skin and eye damage and item discoloration.
- Providing privacy and safety by blocking views from outside and reducing glass damage.

- Improving the look of buildings and reducing glare from sunlight.

Features and Strengths: Erumi Korea's window film is:

- Good for carbon neutrality and eco-friendly construction.
- Uses glass's natural functions and makes windows better.
- Saves energy all year round.
- Pays for itself in about 3 to 4 years.
- Patented and well-priced compared to other films.
- Blocks UV rays effectively and lasts up to 15 years.
- Offers unique services nationwide.

Comparison between Erumi Korea and the different company

1. Patented Technology: Erumi Korea's window film has a special technology that's patented in the country. This makes it stand out in the premium construction market.

2. Price Competitiveness: Because of its unique technology and simplified distribution, Erumi's film is priced competitively compared to other premium films in the market.

3. Strong UV Protection: Erumi's film blocks harmful UV rays effectively, especially in the range of 100 to 400 nanometers. It blocks 100% of UV rays at 400 nanometers, which is really good for protecting indoors.

4. Great Heat Protection and Durability: This film provides excellent heat protection and lasts a long time. It comes with a warranty of up to 15 years, showing its durability.

5. Direct Construction Services Nationwide: You can get specialized services directly from Erumi Korea for installing the film anywhere in the country. This makes it convenient for customers to access their services easily.

Business Effectiveness in Saving Energy: Using Erumi Korea's window film can save energy and money faster than other upgrades like LED lights or new air conditioners.

Performance and Contribution: Erumi Korea's window film is used in many government offices, homes, and businesses. It's also part of green remodeling projects and energy-saving campaigns, earning awards for its environmental efforts.

Thank you.

<https://wefoot.co.kr/>

Company intro

WEFOOT socks are equipped with IN & OUT dual-sided non-slip polyurethane pads, providing excellent slip resistance even against moisture and wet conditions. They enhance shock absorption and improve adhesion between the foot and shoe, supporting stable balance and efficient power transfer. By minimizing slippage, they are highly effective in preventing injuries for athletes and sports enthusiasts who require quick changes of direction. They are also outstanding in preventing slips and falls for general consumers and the elderly who experience discomfort due to reduced walking stability. In-house sports goods manufacturing and sales: Functional non-slip sports socks and insoles produced at our own domestic factory, sold through both domestic and international B2B/B2C channels. Welfare equipment manufacturing: Supplying two types of non-compressive non-slip socks registered as welfare equipment and reimbursable products with the National Health Insurance Service (designated as Senior-Friendly Excellent Products). Class I medical device (compression stockings) manufacturing: Non-slip medical devices that provide strong compression to help improve blood circulation. Sports OEM sock manufacturing: Supplying sports socks featuring WEFOOT's proprietary non-slip pad technology through OEM (Original Equipment Manufacturing) for global sports brands (New Balance, Descente, Yonex, etc.) and specialized non-slip sock companies in Korea and abroad (Goalé, Krits, RTP).

Product Name

Non-slip Socks(Dual-sided asymmetrical polyurethane pads)

Product Details

WEFOOT is a brand that develops and distributes “technology for feet” firsthand. By optimizing high-performance shock-absorbing polyurethane foam—used in LCD applications—for non-slip socks, we manufacture footwear that protects the feet and helps reduce injuries.

“A pad the world has never seen—designed for movement.”

We apply an ultra-slim polyurethane non-slip pad—five times thinner than silicone—in an asymmetric structure on both the inside and outside of the sock. This design minimizes any foreign-body sensation even during long wear, delivering a comfortable fit.

“Non-slip socks trusted by everyone from national athletes to amateurs.”

WEFOOT's signature dual-sided asymmetric non-slip structure is loved by anyone who enjoys sports and wants to prevent injuries. In particular, in high-intensity sports that involve frequent changes of direction, jumping, and running, it has become an essential item chosen by national team athletes.

Through our in-house brands, STAR and GREENDAY, we offer a wide range of athleisure, fitness, and swimwear designed to cater to the diverse needs of modern, active women. Originating in performance sportswear, YULIMGLOBAL has evolved into a holistic lifestyle brand that embodies confidence, elegance, and joy in everyday life. As we continue to grow both in Korea and globally, we remain steadfast in our commitment to cultivating strong, long-term partnerships and driving innovation within the activewear and fashion industries.

Product Name

Women's Basic Short-Sleeve T-Shirt

Product Details

Product Information

Material: 100% Polyester

Color: Baby Pink

Sizes: M / L / XL

Product Measurements (cm)

M: Total Length 55.5 / Chest 44 / Sleeve Length 17.5 / Hem 46

L: Total Length 57.5 / Chest 46 / Sleeve Length 18.5 / Hem 48

XL: Total Length 59.5 / Chest 48 / Sleeve Length 19.5 / Hem 50

Design Points

1. Comfortable Round Neckline

The round neckline allows for easy, comfortable wear without feeling restrictive.

2. Well-Balanced Sleeve Length

The sleeves are designed to cover the upper arms, providing comfort and freedom of movement without distraction.

3. Rounded Hem for Hip Coverage

The rounded hemline naturally covers the hips, enhancing a feminine and flattering silhouette.

4. Eco-Friendly Fabric

Made from eco-friendly material derived from corn-based resources, this fabric features a spring-like structure that offers excellent stretch and recovery.

With moisture-wicking and quick-drying properties, it keeps you dry and comfortable, while maintaining softness and shape even after frequent washing.

Company Requirements

Japanese distributors, wholesalers, and trading companies.

Company intro

TNP International Co., Ltd. is a fashion-focused company specializing in apparel for middle-aged women. Centered around its proprietary brand Madam4060, the company offers clothing through a wide range of distribution channels, including its own online shopping mall, external marketplaces, and home shopping platforms, delivering practical designs at reasonable prices. Based on product planning that deeply understands body shapes and lifestyles, TNP International continuously researches comfortable wear, stable fits, and styles that can be easily incorporated into everyday life. Through ongoing product development and system advancement, the company continues to achieve stable and sustainable growth.

Product Name

Asymmetrical No-Collar Jacket

Product Details

The No-Collar Asymmetrical Jacket features a clean no-collar design that allows easy coordination with a variety of innerwear. Its A-line silhouette effectively covers the body shape, making it especially flattering for middle-aged women. The asymmetrical design combined with a hip-covering length offers a unique yet comfortable look, while functional pockets add everyday practicality. Made with an 8% polyurethane blend and Madam4060's proprietary pattern expertise, the jacket provides excellent comfort and ease of movement. A two-side (double-dyed) yarn technique creates rich, sophisticated color depth, and color-coordinated button details add refined accents for a polished, non-monotonous finish.

Company Requirements

Buyers seeking to expand the Madam4060 brand into overseas markets through online retail platforms and home shopping channels, with a focus on apparel for middle-aged women that emphasizes comfortable fit, practical design, and proven sales performance.

Company intro

Coding I Do Co., Ltd. is a global EdTech company delivering innovative AI-based STEAM learning solutions for early childhood and elementary education. Our mission is to help children learn through play, turning hands-on experiences into meaningful learning outcomes. At the core of our solution is a unique system that connects physical learning blocks with digital applications in real time. Using our proprietary Mirror World interactive technology, children's block manipulations are instantly reflected on screen, creating an engaging and intuitive learning experience that naturally develops computational thinking, creativity, and problem-solving skills. Coding I Do offers a comprehensive STEAM curriculum integrating coding (algorithms), mathematics, science, spatial reasoning, and logical thinking. The platform is designed to be scalable and flexible, suitable for schools, learning centers, and home learning environments. With multi-level content and multi-language support, our solutions can be easily localized for global markets. With a strong focus on product quality, child safety, and continuous technology development, Coding I Do partners with educational institutions and distributors worldwide to deliver future-ready education solutions. We invite global partners to join us in expanding innovative learning experiences to children around the world.

Product Name

MOBLO

Product Details

MOBLO is an AI-powered 3D STEAM learning system that seamlessly connects physical learning blocks with digital applications in real time.

Using proprietary Mirror World interactive technology, children's hands-on block manipulation is instantly reflected on a digital screen, transforming play into meaningful learning.

MOBLO is designed to develop computational thinking, problem-solving skills, creativity, and logical reasoning through intuitive, play-based interaction. By integrating coding (algorithms), mathematics, science, spatial reasoning, and logic, MOBLO delivers a truly convergent STEAM learning experience.

The system supports step-by-step curricula for early childhood and elementary learners, allowing scalable use across schools, learning centers, and home learning environments. Powered by AI and IoT technologies, MOBLO also enables the collection and analysis of learning interaction data, providing a foundation for future content enhancement and personalized learning.

MOBLO is not just an educational toy—it is a next-generation EdTech platform that bridges the physical and digital worlds to prepare children for the future of learning.
